

## HTML Activity (30 mins)

1. Open up your virtual machine and go to [https://www.w3schools.com/html/tryit.asp?filename=tryhtml\\_default](https://www.w3schools.com/html/tryit.asp?filename=tryhtml_default)  
The website will already be bookmarked in the browser.
2. Create an interesting title for your website. This can be anything you want, such as your name, a pet's name, or something you like, or you can even name it "This is a Website".
3. Add at least two images. The width and height should be 40%. Use the link provided to get an image. (<https://github.com/noahKrat/images> )
4. Create a heading for your website that includes your name so that others can know whose website it is when they look at it.
5. Write a brief paragraph about yourself. This can include things such as hobbies, pets, favorite movies or shows, family, places you have visited, or anything else that interests you.
6. Create an ordered list ranking your top 5 favorite movies or TV shows.
7. Create an unordered list of some of your favorite foods.
8. Add something extra. (ex. `<br>`, `<hr>`)
9. Open the Text Editor on your virtual machine (**on the left sidebar**) and copy and paste the code you have written from w3schools into it.
10. Save the document as index.html on your desktop.

## **HTML Extended Activity**

1. Make sure all images and headings are centered.
2. Add 3 more images with a brief (2-3 sentence) description of why you chose the image.
3. Make sure all the headings are bolded text.
4. Italicize the rest of the text.
